

CHIKUNGUNYA

Information for the general public

The disease

- Chikungunya is a viral disease that is transmitted to people by mosquitoes
- It has occurred in Africa, Southern Europe, Southeast Asia, and islands in the Indian and Pacific Oceans
- In late 2013, chikungunya was found for the first time on islands in the Caribbean
- Since then, chikungunya has been found in multiple countries or territories in the Caribbean, Central America, or South America.

Countries with reported local transmission of chikungunya virus (as of July 2014)

The mosquitoes

- *Aedes* species mosquitoes transmit chikungunya virus
- These same types of mosquitoes transmit dengue virus
- These mosquitoes bite mostly during the daytime

Symptoms

- Symptoms usually begin 3–7 days after being bitten by an infected mosquito
- The most common symptoms are fever and severe joint pains, often in the hands and feet
- Other symptoms may include headache, muscle pain, joint swelling, or rash

Testing

- See your doctor if you think you or a family member might have chikungunya

Treatment

- There are no antiviral medicines to treat chikungunya
- There are medicines to help reduce the fever and pain

Illness course and outcomes

- Most patients feel better within a week
- Some people may develop longer-term joint pain
- People at increased risk for severe disease include newborns exposed during delivery, older adults (≥65 years), and people with medical conditions such as high blood pressure, diabetes, or heart disease
- Deaths are rare

Prevention

- There is no vaccine or medication to prevent chikungunya virus infection or disease
- Reduce mosquito exposure
 - Use air conditioning or window/door screens
 - Use mosquito repellents on exposed skin
 - Wear long-sleeved shirts and long pants
 - Wear permethrin-treated clothing
 - Empty standing water from outdoor containers
 - Support local vector control programs
- People at increased risk for severe disease should consider not traveling to areas with ongoing chikungunya outbreaks
- If you are sick with chikungunya, avoiding mosquito bites will help prevent further spread of the virus
